

Policy on Quality and Environment

As an international construction company dedicated to large civil infrastructures and unique building projects and as it is firmly committed to minimising the environmental impact of its business and continuously improving the quality of its work, **LEVANTINA, INGENIERÍA Y CONSTRUCCIÓN, S.L.** has put in place a Quality and Environment Management System based on the following:

Commitments

Analysis of the context of the organisation: Consideration of external and internal issues when drawing up the company's strategic management.

Compliance with requirements: The company undertakes to comply with legal requirements, those of our clients and stakeholders and others to which the organisation subscribes voluntarily.

Objectives and action plans: To efficiently manage the resources allocated to achieve targets and develop its action plans based on the analysis of risks and opportunities.

Conservation of the natural environment and surroundings: To implement actions aimed at preventing air, water and soil pollution, minimising noise levels, reusing, recycling and correctly managing the waste from our business and to ensure the responsible consumption of natural resources by the organisation itself and by our suppliers and subcontractors.

Suppliers and subcontractors: To foster cooperation and jointly promote the capabilities of our external partners to achieve common targets in customer satisfaction and environmental improvements.

Training: To address the cultural differences with the countries in which we carry on our business and create a climate of motivation and effort for all our employees, guaranteeing their continuous training and preparation.

Planning and monitoring: To plan, manage and assess the effectiveness and efficiency of the company's business processes to improve performance levels and promote the use of new technologies in production processes and works management.

Communication and participation: To inform all staff of the importance of effective quality and environmental management and implement actions for their motivation and involvement in achieving the management system targets.

Continuous improvement: Continuously improve the effectiveness of the management system and the company's competitiveness and, consequently, its profitability and our customers' satisfaction, guaranteeing survival over time, environmental protection and the prevention of pollution.

Internationalisation: The company undertakes to apply the principles of its Quality and Environmental Policy in its international offices and subsidiaries.

The Management ensures that the Quality and Environmental Policy is understood and implemented at every level in the organisation and represents its commitment to quality and the environment with the drafting and publication of this policy for all its stakeholders.
